Voice Analysis Tool (VATTM)

818 West Diamond Avenue - Third Floor, Gaithersburg, MD 20878 Phone: (301) 670-4784 Fax: (301) 670-9187 Email: info@gl.com

Website: https://www.gl.com

Voice Analysis Tool (VATTM)

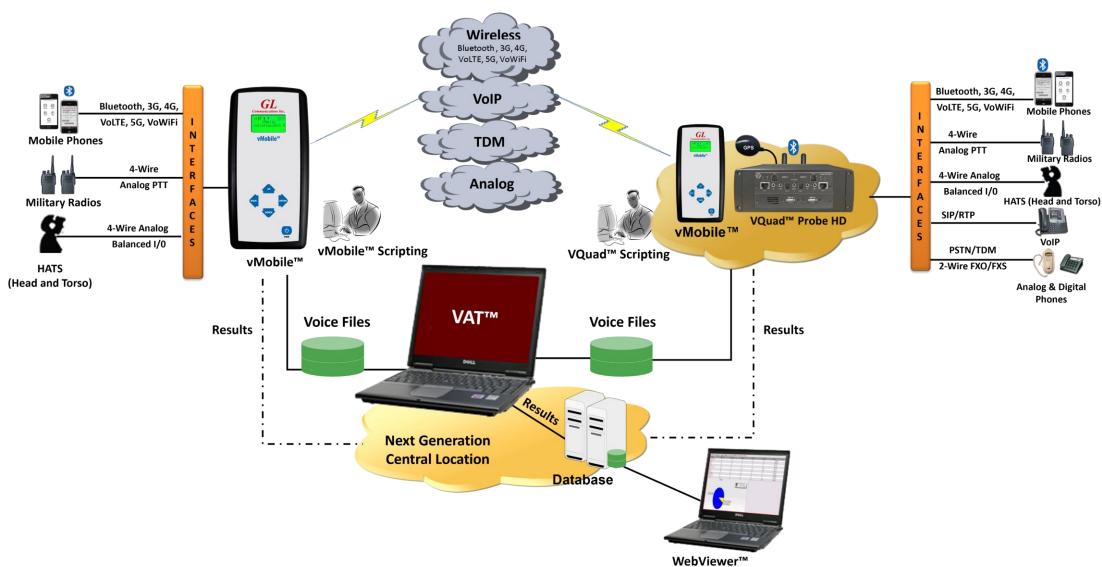

Features

- GL's VAT™ supports analyzing any Raw PCM voice file including NB, WB, and SWB. Audio files can be generated
 from any application including GL VQuad™ and vMobile™
- Fully automated operation with log file containing results and stored in the GL Central Database which can be
 accessed easily using the GL WebViewer™
- VAT™ CLI (Command Line Interface) supports remote operation
- Audio analysis includes, Round Trip and One Way Delay, Dropout Audio analysis, Double-Talk, Power Level and Frequency Analysis, Speech Activity, Active Speech Level and Noise Level, and DC Offset
- Supports VQT analysis when coupled with the GL VQT software
- Supports multiple analytical tests per individual voice file

VAT™ Results

- All the VAT[™] associated results are sent to the GL WebViewer[™] central database and can be accessed using the WebViewer[™] web browser.
- If the network connection is lost between VAT™ and the database, the data is saved internally. Once the network connection is reestablished the data is automatically sent from the VAT™ to the GL WebViewer™ database, so no data is lost.

VAT™ Results on WebViewer™ Database
