

# PacketExpert™ 100G

## (Ethernet/IP Traffic Generation and Analysis up to 100G)

The PacketExpert™ 100G hardware platform features a dual-port configuration with two high-speed 100G QSFP28 ports (Port 1 and Port 2).

These versatile QSFP28 ports can be easily adapted to support 1G, 10G, 25G, 40G, 50G and 100G Electrical/Optical connections by utilizing QSFP+ adapters with respective SFP modules.

This flexibility empowers the platform to offer two Electrical/Optical ports for comprehensive Ethernet testing. Additionally, if higher test port density is desired, multiple NIC cards can be seamlessly connected to the appliance.

2 x 100G ports  
or  
2 x 1G Ports  
2 x 10G Ports  
2 x 25G Ports  
2 x 40G Ports  
2 x 50G Ports

### Key Features

- Supports 2 x 100G ports, upgradeable by 2 ports with addition of each device, up to 8 ports per 4U Rack.
- Includes RFC2544, Y.1564, OAM, BERT, Smart Loopback, and Scripting capabilities (Python) for test automation
- Complete loopback plugs, and adapters
- Flexibility of testing at different speeds (100G, 50G, 40G, 25G, 10G, 1G)
- Dual Ports QSFP28 Cages with Adapters
- Supports QSFP28 form factor

### GL Value Set

- Free Online Training
- Three years of Software Support and Warranty including free upgrades (if any)
- Three years of Hardware Support and Warranty

**100G QSFP28  
Optical Transceiver**

**SFP+ Optical  
Transceiver  
(with Adapter)**

**Adapter**

### Interface Options

Two QSFP28 cages each supporting:

- 100GBASE-SR4/LR4/FR or
- 50GBASE-SR2/LR2 or
- 40GBASE-SR4/LR4 or
- 25GBASE-SR/LR (with QSFP to SFP adapter) or
- 10GBASE-SR/LR (with QSFP to SFP adapter) or
- 1000BASE-X (with QSFP to SFP adapter)

# PacketExpert™ 100G (Next-Generation 100G Carrier-Grade Ethernet Networks )

## Overview

GL's **PacketExpert™ 100G (PXX100/PXX101)** is a cutting-edge hardware platform designed for extensive testing of wire-speed Ethernet and IP networks, supporting speeds of up to 100 Gbps. The PacketExpert™ 100G is a high performance appliance with specialized network interface cards, GL's PacketExpert™ software, large RAM and storage, with optimized processing, and cooling capability. Available in rack-mount and portable platforms.

This versatile device comes with a web-based user interface. All functionalities can be easily accessed through any standard web browser, allowing convenient control from multiple locations and various access devices such as PCs, laptops, and tablets.

PacketExpert™ 100G can perform [Bit Error Rate Testing \(BERT\)](#), [Loopback Testing](#) and [RFC 2544 Testing](#) (throughput, packet loss and latency measurements). Each 100G port provides independent Ethernet/VLAN/MPLS/IP/UDP layer-wise testing at wirespeed. BERT, RFC 2544, and Loopback applications are implemented on all transport Layers including Layer 2 (Ethernet), Layer 2.5 (VLAN / MPLS), Layer 3 (IPv4 / IPv6), and Layer 4 (UDP).

For more information, visit [PacketExpert™ 100G- Comprehensive Ethernet/IP Testing Solution](#) webpage.

818 West Diamond Avenue - Third Floor, Gaithersburg, MD 20878, U.S.A  
(Web) [www.gl.com](http://www.gl.com) - (V) +1-301-670-4784 (F) +1-301-670-9187 - (E-Mail) [info@gl.com](mailto:info@gl.com)

## Main Features

### PacketExpert™ 100G Hardware - Portable LunchBox / Rackmount

- Portable PCIe based hardware supports 2\*100G ports
- Upgradeable to 8 ports in 2 ports increments
- Supports QSFP28 form factor
- Supports 1G, 10G, 25G, 40G, 50G and 100G speeds on the same ports, with suitable adapters and breakout cables.

### Web based User Interface

- Includes web-based interface, accessible by standard web browsers across different operating systems
- The web interface allows multiple users to connect to a single or multiple web servers and independently run tests on different hardware units
- Control multiple devices from a single GUI, multiplying the number of ports available per system

### Wirespeed Ethernet / IP Testing

- Simultaneously generate and receive Ethernet traffic at 100% wire-speed (bidirectional 100 Gbps rate)"
- User-configurable frame size, rate, MAC, IP, MPLS, and VLAN
- Supports Forward Error Correction (FEC) technique to improve communication reliability.
- Wirespeed BERT, Smart Loopback and RFC 2544 applications
- Support for frame lengths from 64 bytes to Jumbo frames (up to 16000 bytes)
- Test at Ethernet (Layer 2), VLAN / Stacked MPLS (Layer 2.5), IP (Layer 3 including IPv4 and IPv6) and UDP (Layer 4)
- Customize Ethernet, IP and UDP protocol headers
- Multi-device support for all the applications for high density testing, upto 4 devices ease, more possible
- Bit Error Rate Testing (BERT) supports industry standard PRBS patterns – 2<sup>9</sup>-1, 2<sup>11</sup>-1, 2<sup>15</sup>-1, 2<sup>20</sup>-1, 2<sup>23</sup>-1 and 2<sup>31</sup>-1, as well as user defined static patterns
- Python Application Programming Interfaces to allow scripting and automation (Optional)
- Real-time results are displayed in both tabular and graphical representations
- Test result reports available in PDF and CSV file formats
- Detailed frame statistics presented in tabular format for all the ports

### Wirespeed BERT Across all Layers

- BERT is applicable for Ethernet (Layer2), up to 3 Stacked VLAN (Q-in-Q), up to 3 Stacked MPLS (Layer 2.5), IPv4/IPv6 (Layer3) and UDP (Layer4)
- Intentionally introduce single bit errors or at a desired rate
- User-defined header parameters for MAC, VLAN, MPLS, IPv4/IPv6 and UDP layers
- Multi-device support for wire-speed BERT and simultaneous BERT/Loopback applications to increase the number of parallel BERT tests
- Real-time graphical representation of the combined Throughput and Bit Error rate can be plotted over time for BERT testing

### RFC 2544 Network Testing

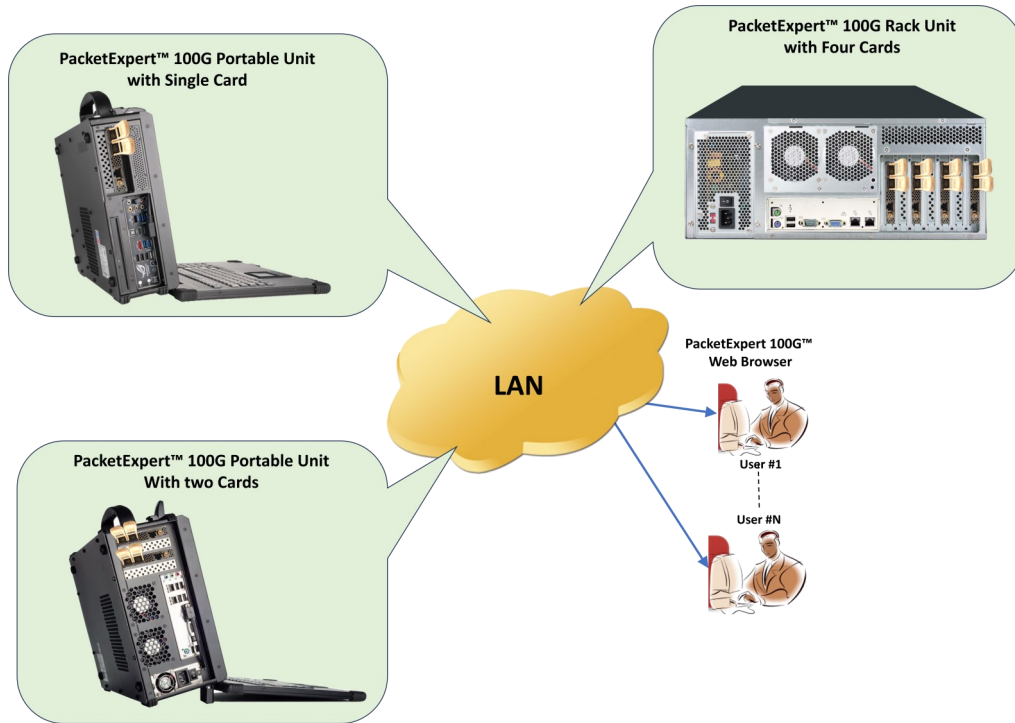

- RFC 2544 is applicable for Layers Ethernet, VLAN, MPLS, IPv4/IPv6
- Supports Throughput, Latency, Frame Loss, and Back-to-Back performance tests
- Uni-directional and bi-directional RFC 2544 testing supported
- User-defined configuration parameters such as frame size, trial duration, number of trials, etc.
- User selectable single or dual ports RFC 2544 testing
- Multi-device support for multiple parallel RFC 2544 tests
- Graphs and Statistics for all the RFC 2544 tests

### Smart Loopback Testing

- Supports smart loopback (auto layer detection), swap source and destination addresses at MAC, IP, and UDP layers
- Multi-device support for all port loopback application to increase the number of simultaneous Loopback ports

## Multiple Servers and Multiple Devices

The PacketExpert™ 100G Web interface offers users the convenience of accessing multiple servers that are located in different areas within the same LAN. This allows for seamless connectivity and management of multiple PacketExpert™ 100G devices from a single server, enhancing efficiency and control.

PacketExpert™ 100G - Multiple Servers and Multiple Devices

The screenshot shows the PacketExpert™ 100G web interface. At the top, there are navigation tabs: Dashboard, Servers, Event Log, and Admin. Below this, there are sub-tabs: Devices, Ports, BERT, Loopback, and RFC 2544. A 'Load' and 'Save' button is visible. The main content area features a 'Devices' table with a 'Quick Config' button and a 'Test Status' icon.

Device	Serial#	Availability	User	Speed	Application	Test Status
Device1	0000-271142	Reserved	Admin	100G	All Port BERT	●
Device2	0000-271144	Reserved	Admin	40G	BERT/Loopback	●
Device3	0000-271145	Reserved	Admin	25G/10G/1G	RFC 2544	●

Below the table are several panels:

- License Details**:

Core Supply Temperature	45 °C	●

PacketExpert™ 100G Web Interface with Multiple Devices

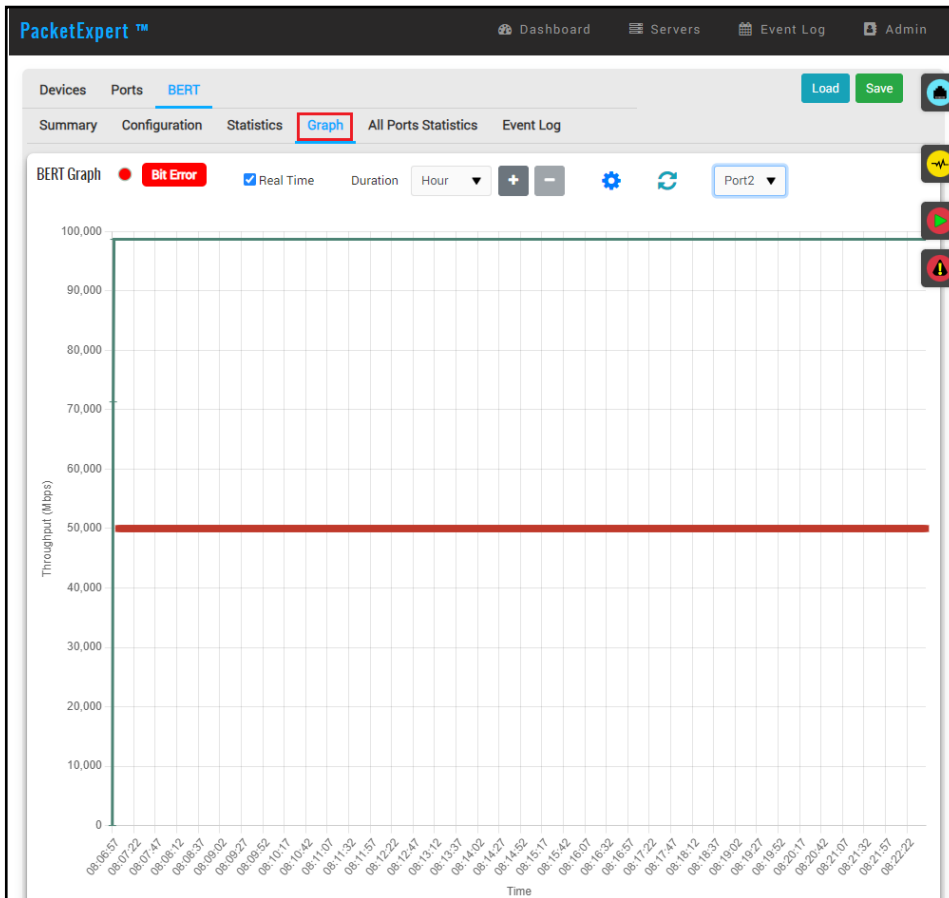

## Wirespeed BER Testing

PacketExpert™ 100G supports Wirespeed BERT up to 100Gbps simultaneously over Framed Ethernet (Layer2), Stacked VLAN (Q-in-Q), Stacked MPLS (Layer 2.5), IPv4/IPv6, and UDP. It can generate and receive various BER Traffic Patterns, including various industry standard PRBS patterns, User-defined test patterns, Bit Error Insertion, and FCS Error Insertion. Wirespeed BERT is supported on two 100 Gbps Optical ports. The screen below displays the PacketExpert™ 100G web interface, running All Port BER test on both the Port#1 and Port#2 Optical ports. Optional sequence number insertion allows detecting out-of-sequence packets and packet loss.

PacketExpert™ 100G - BERT Testing

PacketExpert™ 100G offers a real-time presentation of the combined Throughput and Error Events detected during Bit Error Rate Testing. These occurrences are depicted on a graphical chart as data points over the course of the test. The graph initiates at the beginning of the BER test and stops when the BERT test is terminated.

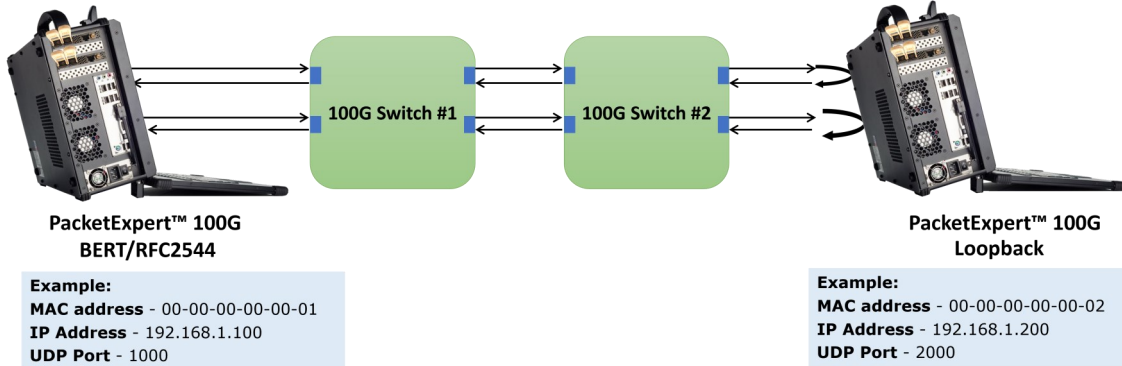

All Port BERT Graph with Bit Error

## All Port Loopback Testing

PacketExpert™ 100G offers Smart Loopback capability on two 100 Gbps Optical ports (Port 1 and Port 2). When in Smart Loopback mode, PacketExpert™ 100G analyzes incoming traffic, identifies Source and Destination Addresses, and then redirects the traffic on the same port after swapping them. It effortlessly manages stacked VLAN and stacked MPLS configurations.

**PacketExpert™ 100G - All Port Loopback Testing**

Incoming Packet

Ethernet Destination MAC Address	Ethernet Source MAC Address	Ethernet Length/Type field	Source IP Address	Destination IP Address	IP Protocol	Source UDP Port	Destination UDP Port
00-00-00-00 00 02	00-00-00-00-00-01	08 00 (IP) ...	192.168.1.100	192.168.1.200	17 (UDP)	1000	2000

Outgoing Packet (after swapping Source/Destination MAC addresses, Source/Destination IP Addresses and Source/Destination UDP Ports)

Ethernet Destination MAC Address	Ethernet Source MAC Address	Ethernet Length/Type field	Source IP Address	Destination IP Address	IP Protocol	Source UDP Port	Destination UDP Port
00 00-00 00 00-01	00-00-00-00-00-02	08 00 (IP) ...	192.168.1.200	192.168.1.100	17(UDP)	2000	1000

**PacketExpert™ 100G - Smart Loopback Testing**

## BERT and Loopback Testing

For testing across a network, the remote PacketExpert™ 100G can be left in Loopback mode. BERT is controlled by the local end PacketExpert™ 100G.

**PacketExpert™ 100G - BERT and Loopback Testing**

## RFC 2544 Testing

PacketExpert™ 100G supports RFC 2544 tests on two 100 Gbps Optical ports (Port 1 and Port 2) on Layers 2, 2.5, and 3. RFC 2544 tests includes Ethernet Throughput, Latency, Frame Loss, and Back-to-Back performance tests in accordance with RFC 2544 specifications. The test is setup such that the traffic can be generated and transmitted on either of the ports and the looped back traffic from the DUT is received on the opposite port validating the test parameters.

**PacketExpert™ 100G**

**PacketExpert™ 100G - Dual Port RFC2544 Testing**

When conducting a single-port RFC 2544 test using PacketExpert™ 100G, you can choose to perform the test on either Port 1 or Port 2 individually, but it is not feasible to run RFC 2544 tests concurrently on both Port 1 and Port 2.

**PacketExpert™ 100G - Single Port RFC2544 Testing**

# PacketExpert™ 100G Hardware Platforms

## PacketExpert™ 100G 4U Rack PC

### Specifications

Dimensions	6.9" H x 16.9" W x 17.5" D
Weight	72 lbs.
Expansion slots	7
Power supply	Redundant 1200W

## Ultra-Portable PacketExpert™ 100G (Lunchbox)

### Specifications

Dimensions	12.4" H x 16.41" W x 4.39" D
Display	17.3" 1920x1080
Weight	16.5 lbs.
Expansion slots	Up to 2
Power supply	400W (optional 500W)

## Portable PacketExpert™ 100G (Lunchbox)

### Specifications

Dimensions	13.62" H x 16.50" W x 7.25" D
Display	17.3" 1920x1080
Weight	~23 LBS (10.4KG)
Expansion slots	Up to 4
Power supply	680W 100/240VAC

## PacketExpert™ 100G Hardware Platforms

### PacketExpert™ 100G 1U Rack PC

#### Specifications

<b>Dimensions</b>	1.7" H x 17.2" W x 9.8" D
<b>Weight</b>	10 lbs
<b>Expansion slots</b>	1x Full-height
<b>Power supply</b>	200W

### PacketExpert™ 100G Portable Platform (Lunchbox)

Total 8 Ports  
4x(2x1G/10G/25G/  
40G/50G/100G)

#### Specifications

<b>Dimensions</b>	6.9" H x 16.9" W x 17.5" D
<b>Display</b>	17.3" 1920x1080
<b>Weight</b>	72 lbs.
<b>Expansion slots</b>	7
<b>Power supply</b>	Redundant 1200W

## Buyer's Guide

Item No	Product Description
<a href="#">PXX100</a>	PacketExpert™ 100G Platform (1G, 10G, 25G), All Port BERT, BERT/Loopback, RFC2544, Y.1564
<a href="#">PXX101</a>	Basic Software (Required for PXX100)
<a href="#">PXX103</a>	Additional 2-port card with Basic Software (Up to 4, 2-Port Cards (including the basic 2-Port Card) total per system for 8-Port testing; required for PXX107)
