Release Notes for PacketExpert™ 100G Version 24.11.20

PacketExpert™ 100G is a cutting-edge hardware platform designed for extensive testing of wire-speed Ethernet and IP networks, supporting speeds of up to 100 Gbps. The PacketExpert™ 100G is a high performance appliance with specialized network interface cards, GL's proprietary PacketExpert™ software, large RAM and storage, with optimized processing, and cooling capability. Available in rack-mount and portable platforms. If higher test port density is desired, multiple SmartNIC cards can be installed. PacketExpert™ 100G has a web-based user interface.
